Product data sheet

Overview

Bowey hydraulic filter element are designed for use in filters that have been designed to operate in industrial and mobile hydraulic systems. They will protect hydraulic components from particulate contamination. Our replacement filter elements improve efficiency, keep fluids cleaner, and ensure smoother operations. All of our replacements filter elements ensure installation and using!

Features

- Material: fiber glass, oil paper, stainless steel mesh
- Operating Pressure: 1.0Mpa, 2.0Mpa, 16.0Mpa, 210Mpa
- Filtration Efficiency: 99.9%
- Filter Rating: 1-100um

- O-Ring: NBR, fluoro rubber
- Application Field: lubricating oil & hydraulic oil system

Benefits

- Improve hydraulic oil quality and service time
 - Reduce friction of parts in equipment
 - Increase the life of the device
-
