

Temperature Controller, CW-662

URL:<https://www.sxplc.com/temperature-controller-cw-662>

Product data sheet

Simple

- Easy to operate.
- Large and high-definition LED display.

Intelligent

- Independent temperature control, applicable to various injection condition from low voltage nozzles to large capacity manifolds.
- IMM lock function prevents data change caused by misoperation.
- High precision temperature control, tolerance range within $\pm 0.01^{\circ}\text{C}$.

- Soft start function prevents sudden heat.
- Both manual and automatic backup functions.

Efficient

- Auto-tuning mode allows the temperature to rise quickly and remain stable (Quick/Full tuning).

Safe and Reliable

- Equipped with overvoltage protection software, highly reliable.
- 17 internal safety inspection functions.
- CE certification, UL approved.
