

Programmable controllers XC3-32R- E

URL:<https://www.sxplc.com/programmable-controllers-xc3-32r-e>

Product data sheet

Features

Program capacity: 8000 Steps

Number of inputs: 18

Input type: Voltage free or NPN contact

Input signal voltage: 24VDC +/- 10%.

Number of outputs: 14

Output type: Relay: 3A 250V AC / 30VDC Load

Resistive; 80VA Inductive Load

Maximum Input and Output Points: 228 (7 Expansion Modules)

Internal Coils (M): 8,512

Scan Time: 0 - 99 mS

Real Time Clock: Yes

Communication Ports: COM 1: RS232 / COM2: RS-485

Power supply: 100- 240 VAC

Basic logic control and data operation support

Supports high speed counting

External interrupt

C language function block

Free protocol communication and MODBUS communication

D4000 to D7999 remanent or eeprom registers
