

Check valve □ CPDG-06-50-20

URL: <https://www.sxplc.com/check-valve-cpdg-06-50-20>

Product data sheet

Valve standard: Japanese standard

Form: straight through type

Disc type: flange check valve

Number of valve discs: single disc structure

Function form: Quick opening

Drive mode: hydraulic

Structural form: unidirectional

Valve function: adjustment

Action mode: single action

Type (channel position): three-way

Function: backstop type

Lining material: carbon steel

Sealing material: cast iron

Sealing method: hard sealing

Pressure environment: atmospheric pressure

Temperature environment; eighty

Flow direction: unidirectional

Accessories available: valve body

Applicable industry: Machinery

Applicable medium: oil products
