

## Pretreatment Pack, PR0G000T3

URL: <https://www.sxplc.com/pretreatment-pack-pr0g000t3>

### Product data sheet

The T3 pretreatment pack pretreats tap water by removing large particles, organic compounds and free chlorine. This pack optimizes system lifetime by protecting the reverse osmosis (RO) membrane against organic fouling, chlorine oxidation, and mineral scaling. This pack includes polyphosphates, activated carbon and a depth filter for water pretreatment. The pack is suitable for tap water feed with silt density index (SDI) < 5, Cl<sub>2</sub> <1 ppm.

Product Information		
<b>Components</b>	<ul style="list-style-type: none"> <li>◦ Polyphosphate</li> <li>◦ Activated carbon</li> <li>◦ Depth-filtration</li> </ul>	
<b>HS Code</b>	8421 21 00	
<b>Quality Level</b>	<a href="#">MQ300</a>	
Applications		
<b>Application</b>	Protects RO membrane from scaling, fouling, chlorine oxidation • Suitable for tap water feed with silt density index (SDI) < 5, Cl <sub>2</sub> <1 ppm	
Materials Information		
<b>Chemistry</b>	• Cartridge: Polypropylene and EPDM rubber	

Packaging Information		
Material Size	1	

Global Trade Item Number		
Catalog Number		GTIN
PR0G000T3	04053252359309
