

Polishing Cartridge, QPAK00TEX

URL: <https://www.sxplc.com/polishing-cartridge-qpak00tex>

Product data sheet

Organex & ion-exchange resins purifies feed water

- Removes ionic and organic impurities down to trace levels
- RFID tag for full traceability

The polishing cartridge removes ionic and organic contaminants down to trace levels when fed with purified water. This cartridge uses organex and ion-exchange resins to purify the feed water. It is constructed from clean and high-purity materials to minimize the leaching of extractable contaminants. It features an e-sure RFID tag for full traceability and instant visibility on pack parameters.

Product Information		
HS Code	8421 21 00	
Quality Level	MQ300	
Applications		
Application	<ul style="list-style-type: none"> • Organex & ion-exchange resins purifies feed water • Removes ionic and organic impurities down to trace levels • RFID tag for full traceability 	

• For Direct water systems
