Product data sheet

Siemens Advanced Motor Starter, Reverse Function, Rated Voltage 500V - SIRIUS Series -
3RM1202-1AA04

Get your machine up and running with this state-of-the-art Siemens motor starter. It supports devices rated up to 3kW and can operate at the flip of a switch, providing reliable switching for everyday motor drive equipment. When its output current is adjusted between 0.4 and 2A, the unit provides direct control over the electrical performance of the motor, allowing you to closely manage the machine. Thanks to the portable front dial, which can be adjusted with a screwdriver, the motor current can be easily changed. The reverse start function solves the problem of changing the direction of rotation of the motor and enables multi-purpose control. These motor starters are often used in conjunction with conveyors and manufacturing machinery.

Features and Benefits:

- The slim body measures 22.5 (W) x 100 (H) x 141.6 mm (D) to save installation space

- Power consumption is only 0.3W for energy-efficient system control
- Rail-mounted, snap-in into your setup without the need for special tools
- Comes with overload protection to avoid damage due to power failure

Is it possible to install this product as part of a set of motor starters?

Yes, this motor starter is suitable for group installation, sharing power and circuit breaker with your other motor starters to simplify wiring.
