

Relief valve AR925-N20G

URL:<https://www.sxplc.com/relief-valve-ar925-n20g>

Product data sheet

Valve standard national standard

Morphology: Spherical

Drive mode: Pneumatic

Structural form: unidirectional

Mode of action Double acting

Type (channel location) Two-way type

Function: Stress reducing

Lining material: Rubber

Sealing material: Rubber

Sealing method: Soft seal

Pressure Environment: Atmospheric pressure

Temperature: Room temperature

Flow direction: unidirectional

Can be equipped with accessory springs

Applicable Industries Electricity

Applicable medium: Air
