

Fans D2D160-BE02-11

URL:<https://www.sxplc.com/fans-d2d160-be02-11>

Product data sheet

Basic parameters

Product name: EBMPAPST centrifugal fan

The product model D2D160-BE02-11

Origin The place where the factory is located

Brand ebmpapst ebm-papst

Category: Centrifugal fans

Type: Backward centrifugation

Size: Impeller diameter 160mm

Functional parameters

Operating voltage 380V

Operating frequency 50Hz

Noise level 64db

Power size: 700W

Motor speed 2700r/min

The maximum wind pressure is 200Pa

Operating ambient temperature 40°C

Bearing structure Motor ball bearings

The maximum air volume is 1195m³/h

Product capacitance 10uF

Service life: Please refer to the attachment for details

Product Material: Sendezimir galvanized steel sheet
