### Product data sheet

|                                   |
|-----------------------------------|
|                                   |
| Main Body Shape                   |
|                                   |
| Standard                          |
|                                   |
| Cylinder (Tube) Inner Diameter(Ø) |
|                                   |
| 25                                |
|                                   |

|                     |
|---------------------|
|                     |
| Stroke(mm)          |
|                     |
| 160                 |
|                     |
| Additional Function |
|                     |
| Standard            |

|                           |
|---------------------------|
|                           |
| Environment, Applications |
|                           |
| Standard                  |
|                           |
| Cushion                   |
|                           |
| Rubber bumper (standard)  |
|                           |

|                                |
|--------------------------------|
|                                |
| Head cover type(?)             |
|                                |
| Basic (integrated clevis type) |
|                                |
| Operating Pressure(MPa)        |
|                                |
| 0.05 to 1.0                    |
|                                |
